Principles of formative assessment

John Bostock
Senior Lecturer in Teaching and Learning Development
Principles of Assessment for Learning

* The provision of effective feedback to students.
* The active involvement of students in their own learning.
* Adjusting teaching to take account of the results of assessment.
* Recognition of the profound influence assessment has on the motivation and self-esteem of students, both of which are critical influences on learning.
* The need for students to be able to assess themselves and understand how to improve.
The need for students to be able to assess themselves and understand how to improve

- Using quiz making software and embedding the quiz into Smart Board
- Useful initial recap exercise to recall key concepts from previous learning
- Useful consolidation exercise to review key concepts at the end of a session
- Excellent resource to stimulate discussion and dialogue around key concepts
