

Risk Assessment Template

Task To Be Assessed:	Re – Opening the Sports Facilities f coronavirus pandemic	ollowing the closure as a result of the	THE REAL PROPERTY OF THE PARTY		
Assessor Name:	Morley Lewis				
Reference Number:	n/a				
Number Of People Exposed:	Up to 300 per day	Assessment Date:	Most Recent update 20/1/2022		
People Exposed (Staff / Student / Visitor):	Students – During academic stu Community – Edge Hill Sport Me	versity Academic and Support Staff dy and when engaging in recreation embers, and attendees at hirer booki Hill University and Edge Hill Sport			
Department:	FM – Edge Hill Sport	Location of Activity:	Edge Hill Sport operated facilities		
Activity Description: (Please give a description of the activity you	There is a suite of EHU procedural	and guidance document in relation to th	e control of Covid,		
are risk-assessing, including times, number of	highlighting roles and responsibiliti	es and appropriate arrangements for situ	uations such as giving		
people, and current controls where applicable)	first aid, wearing PPE, using Unive	rsity vehicles, using face coverings and	supporting clinically		
	extremely vulnerable people.				
	Risk scoring:				
	- EHU has approximately 1,700 sta	ff and 12,000 students. Current local inf	ection rates for		
	West Lancashire (7 days to 15/1/2	1) is 957 cases per 100,000 of the popul	ation. This is		
	reflective of high national case rate	s due to Omicron but is a fall of peak of	infection at the		
	beginning of January of 2608 per 1	00,000 on 4th January. The Number of p	patients in		
	hospital in the local NHS trust (Sou	cal NHS trust (Southport and Ormskirk) is currently falling.			
	- Lower hospitalisation rates are largely due to the large proportions of the population being				
	vaccinated and Omicron being rep	orted as milder than previous variants. T	herefore, the		
	most likely outcome for an individu	al contracting Covid is a minor illness.			
	- The scoring in this risk assessme	nt is done on the basis of the risk to an i	ndividual and in		
	consideration of the data above, w	th approximately one in ten chance of co	ontracting		
	Covid with the likely outcome for a	non-vulnerable person being minor illne	SS.

*outbreak is defined as 2 of more cases within the same setting (for Higher education, subsetting) such as a department of teaching cohort within a 14-day period. There does not need to

be a clear link between cases for it to be classed as an outbreak

This assessment considers the risks of re-opening the sports facilities following the closure during the Covid-19 pandemic. It considers the additional hazards created by carrying out the closure, and the potential exposure to coronavirus during the centres ongoing operation

In addition to this 'covid risk assessment', and the regular facility and activity assessments there are also 'Covid risk assessments' for the Pool, Fitness Suite, and Café. specific assessments have been made to identify the additional measures required in response to the pandemic in relation to the activities in the swimming pool

This assessment is written in line with guidance from the World Health Organisation (WHO), CC Leisure Solutions, UK Government, and UK Active. The hazards related to coronavirus are considered by the spread of the virus by inhaling infected particles, and coming into contact with surfaces on which there are infected particles.

Hazard Checklist – use this to identify the hazards to be considered:

Situational	Tick	Physical / Chemical	Tick	Environmental	Tick
Slip, trip, fall		Harmful substances	✓	Temperature	
Fall from height		Electrical (shock, burns, fire, arcing, explosion etc)		Weather	
Lone Working		Biological agents	✓	Extreme locations (mountains, mud flats etc)	
Manual Handling		Fire		Use of sharps	
		Machinery (entanglement, incorrect setup etc)		Vehicle movements	

N.B. The above list is not exhaustive and additional options can be found in the Risk Assessment Guidance for Biology (Appendix A) and Media (Appendix B)

Conti	ractors	All users encouraged to practice good hygiene (e.g. regular
		handwashing)
		Signage informing users not to enter building if suffering from
		symptoms of covid-19
		All mechanical ventilation systems on campus assessed and
		modified in line with CIBSE guidance on ventilation
		(risk based approach to CO2 monitoring, with further risk
		assessments undertaken where appropriate in areas
		highlighted as having poor ventilation)
		In the absence of mechanical ventilation, natural ventilation to
		be used by opening windows
		lee dood by opening mindene
		Communication to staff and students of important Covid-19
		safety messages, including not attending campus if you have
		symptoms
		Face coverings may be worn around the Sports Centre by
		users
		Workplace inspections to ensure suitable controls are
		maintained
		Encouragement for all staff and students to be fully vaccinated
		and take up booster vaccines

Reception areas have Perspex screening to protect staff
working in these areas.
If staff member was to test positive they would follow
government guidance for isolating.

Risk Factor / Residual Risk Factor (R) = Likelihood (L) x Consequence (C). Refer to Risk Matrix on final page.

Assessment conclusion: (i.e. have all foreseeable hazards been identified and control measures put in place to ensure that the risk is as low as reasonably practicable, provided all additional control measures identified have been put in place?)	The additional risks to the facilities users have been identified using guidance from PWTAG, WHO, IOSH, UK Active, and CC Leisure Solutions and reasonably practicable controls identified.
	This assessment is to be followed in addition to the existing facility and activity risk assessments, and also the area specific COVID re-opening assessments for the Fitness Suite, Pool, and Café.
Signature of Line Manager / Competent Person:	Morlezlenis
Review Date:	Reviewed on 24.10.2020 – No change Reviewed on 8.4.21 – slight amendment – Andrew Hampson Reviewed 27.9.21 – Amendments made as per government guidance - Andrew Hampson 1.12.21 - – Amendments made as per government guidance -Andrew Hampson 20.1.22 – Amendments made as per government guidance -Andrew Hampson

Next review due Sept 2022 or when there is significant change to the status of the pandemic, guidance from EHU, GOV, or CIMSPA, or significant change to the centres operation.

Risk Matrix

		CONSEQUENCE						
		1 Insignificant	2 Minor	3 Moderate	4 Major	5 Critical		
		1 NO ACTION	2 NO ACTION	3 MONITOR	4 MONITOR	5 MONITOR		
	1 Rare							
Q	2 Unlikely	2 NO ACTION	4 MONITOR	6 MONITOR	8 ACTION	10 ACTION		
ПКЕПНООВ	3 Possible	3 MONITOR	6 MONITOR	9 ACTION	12 ACTION	15 URGENT ACTION		
	4 Likely	4 MONITOR	8 ACTION	12 ACTION	16 URGENT ACTION	20 STOP		
	5 Almost Certain	5 MONITOR	10 ACTION	15 URGENT ACTION	20 STOP	25 STOP		

Risk = Likelihood x Consequence

Likelihood:

- 1 Rare this will probably never happen
- 2 Unlikely do not expect it to happen / recur but it is possible it may do so
- 3 Possible might happen or recur occasionally
- 4 Likely will probably happen / recur but it is not a persistent issue
- 5 Almost Certain will undoubtedly happen / recur, possibly frequently

Consequence:

- 1 Insignificant no or minimal injury / insignificant damage to equipment or property
- 2 Minor minor damage to property, or minor injury or illness requiring minimal medical intervention
- 3 Moderate injury requiring medical assistance and could result in time off work, damage to property requiring repair
- 4 Major major injury or damage to property, leading to prolonged time off work, increased time in hospital, and likely prosecution
- 5 Critical incident leading to multiple permanent injuries, irreversible health effects, or death. Permanent loss of facility, or persecution

Risk Factor / Residual Risk Factor:

NO ACTION (1-2): No further action, but ensure controls are maintained and reviewed

 $\label{eq:MONITOR} \textbf{MONITOR (3-6): Look to improve at next review or if there is a significant change}$

ACTION (8-12): Improve within a specified timescale

URGENT ACTION (15-16): Take immediate action and stop activity if necessary; maintain existing controls rigorously

STOP (20-25): Stop activity immediately
