

Title: The Use of Blackboard to Design and Deliver Computer-Based Summative Examinations: Challenges and Solutions

Abstract: This presentation aims to demonstrate the steps that can be followed in designing and delivering computer-based summative examinations. It will focus on the problems in setting up computer-based examinations as well as running the examinations and how to solve them. The presentation will also discuss the benefits and limitations of using Blackboard as a platform to design, run and mark computer-based examinations. An exemplary module will be used as a case study to explore various issues in the presentation.
